CHECK	COUNT	DETAIL
Positions valued at cost	1	Jost's Engineering Company Ltd.
Negative net quantity	1	Kisan Mouldings Ltd. (-1,00,000)
Scrips with no price history	2	Some Delisted Ltd, Another Old Name
Companies without a sector	2	grouped as Unclassified in the sector table
Sessions under 98% priced	3	NAV on those sessions is partial

BASIS &
METHODOLOGY

- NAV is PRE-TAX and before fees. No tax provision or expense accrual is applied, so it is not comparable to a post-tax fund NAV.
- NAV is indexed to 1000 on 01-Apr-2025 — not at inception. Market value before that date cannot be derived from the ledger, whose pre-FY26 position is a 31-Mar-2025 snapshot of surviving lots rather than a transaction history.
- Returns are TIME-WEIGHTED: each session's return is measured after removing capital paid in or taken out, so deploying or withdrawing money is never counted as performance.
- Historical prices are stored un-adjusted (the price actually traded), and share counts come from the ledger, so splits and bonuses are counted once rather than twice.
- Listed equity positions only. Unlisted holdings, cash balances and AMFI market-cap classification are not tracked by this system.
- Cost basis is FIFO and charge-inclusive. Cost per share is carried at full precision, not rounded to paise.
- 4.23% of portfolio value is carried at COST because no market price was on file; those positions show no gain or loss.
- 1 position with a negative net quantity are excluded from every figure here and need reconciling.
- 2 of 14 companies have no sector on file and are grouped as Unclassified.
- 2 scrips had no price history and contribute nothing to the NAV series or to any return on this sheet.
